DUELMARK AEROSPACE CORPORATION

Duelmark Aerospace Corporation (DAC) is a full service interconnect system company specializing in military and commercial application. We design, develop, prototype, manufacture and repair a wide range of electrical interconnect systems.

QUALITY

At DAC quality is not something that's just talked about, it's guaranteed. DAC is ISO9001 certified through Intertek Certification and also MIL-I-45208 certified for government requirements.

CONVENTIONAL ROUND BUNDLE CABLE/HARNESS ASSEMBLIES

DAC designs prototypes and manufactures a large variety of round bundle and cables/harness assemblies. Our customers rely on our experience and expertise to provide creative solutions to complex cable/harness problems.

ORGANIZED WIRING SYSTEMS

Organized wiring is the cutting edge wiring system technology. These systems usually consist of flat ribbonised cable/wire harness assemblies with wire integration units. Wire ribbons are stacked or layered to the desired ribbon count and can be either woven or film bonded. DAC is the industry leader in organized wiring system technology.

BUILD TO PRINT

Rely on the experts at DAC to manufacture to your specifications and or your unique requirements.

REPAIR CAPABILITIES

DAC has the ability to repair most repairable and non-repairable harness assemblies.
